

INTRODUCING

THE DISCRUPTOR

an innovative new tool for self-servicing
your Geringhoff Rota Disc® shafts.

This tool allows for proper maintenance of your Rota Discs at required service intervals. Replacing worn out discs when needed saves on premature wear and tear of other header components, resulting in optimum header performance, and unwanted down time.

THE DISCRUPTOR

- Ensures ease and safety of servicing disc shafts in a stable work environment.
- Dramatically reduces the amount of time taken to service disc shafts compared to other methods of disassembly and reassembly.
- Quality craftsmanship and engineering combined with CNC machined precision.
- Built to Last.
- Will be a valuable tool in your maintenance arsenal for many years to come, saving significant time and money over the life of your Geringhoff Rota Disc header.
